Projects

All projects at: *orionwesson.com* and *github.com/EnterOrion*

Snail Pic of the Day

- Utilizes my own REST API to retrieve the pics I've taken, using Node.js and MongoDB.
- Manages authentication through an admin dashboard to post new photos.
- React and SASS for the frontend. Each photo has a brief description and its own category.

Shopping Cart

- A fully responsive mock shopping page of my favorite band built with React.
- Each item has its own detailed product page.
- Through using Zustand, the cart's state can be updated anywhere in the app.

Where's the cat?

- Offers three different levels, each one increasing dramatically in difficulty.
- Firebase was used to store the cat's coordinates to prevent cheating, along with the leaderboard which a fast enough user can write to.

Education

The Odin Project · Remote   05/2023
Completed project-based, open-source Full Stack Javascript curriculum. Collaborated with dozens of other students of the course by answering questions and giving advice when needed.

University of Oregon · Eugene, OR   09/2022
B.A. – Linguistics | Summa cum laude graduate *(4.0+ GPA)*.

Experience

Canvasser (Team Lead)

The Outreach Team · Eugene, OR   03/2022 - 06/2022
- Third top signature gatherer. Gathered thousands of signatures for the Oregon IP14 ballot measure.
- Mentored thirty plus new members to help them improve and reach quota.
- Knocked on hundreds of doors in Oklahoma for State Question 812.

Research Assistant

Speech Perception and Production Lab · Eugene, OR   09/2019 - 05/2022
- Developed research on speech perception with a team of undergraduates.
- Presented at the Undergraduate Research Symposium twice, one of which won the CAS Humanities Dean Poster Award.
- Helped build and analyze research with PsychoPy, R, and Python.

Skills

JavaScript, MongoDB, Firebase, Express.js, React, Node.js, SASS, Git
